

Charms Help

Charms App: Using the Free Charms Mobile App

A simplified version of Charms is available as a free app for iPhone and Android. Though it does not have all the detailed features of the desktop browser version, you should still be able to easily access your profile, calendar, financial ledgers, documents, and attendance records.

Simply go to your app store and download the Student/Parent version of Charms. *Be careful not to download the Administrator version!*

Note: At this time, online payments are not available through the app, only through your desktop browser version.
